PUBLIC MEETING

December 8, 2015

John R Road Reconstruction
 Long Lake Road to South Boulevard

John R Reconstruction Project

The John R Reconstruction project limits extend from the north side of the Long Lake Road intersection to the M-59 bridge over John R Road just north of South Boulevard. All side street approaches within these limits will be included in the reconstruction. The estimated construction cost (using combined federal and city funding) is \$14.7 million.

PROJECT INCLUDES:

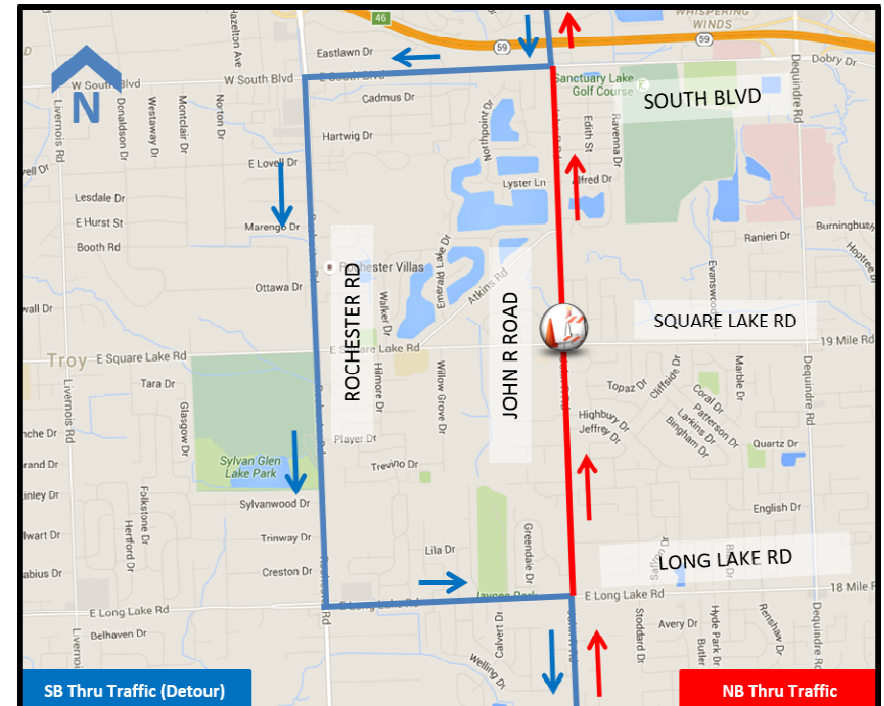

- ▶ 2 miles of asphalt reconstruction
- ▶ 3 lanes wide with a continuous center left turn lane
- ▶ Curb and gutter and catch basins
- ▶ Addition of a continuous eight-foot wide sidewalk (east side)
- ▶ Addition of a continuous ten-foot wide asphalt path (west side)
- ▶ New water main and hydrants (Long Lake to Square Lake)
- ▶ Sanitary sewer construction (locations vary)
- ▶ Storm sewer construction
- ▶ Driveway replacements
- ▶ Two new traffic signals at Square Lake & South Blvd
- ▶ Sidewalk ramp replacement to meet current standards
- ▶ Bridge deck replacement at the Nelson Drain
- ▶ New signing and pavement markings
- ▶ New street lighting

You may have noticed work along John R Road earlier this year. Utility relocations are underway so utility work can be completed before roadway work begins.

DETOUR

- ▶ John R Road will remain open to normal two-way traffic during the first stage of the construction. Work will be completed to install new underground utility lines on each side of John R Road.

- ▶ During the 2018 construction season John R Road will be closed to southbound traffic and will carry one-way traffic northbound. Southbound traffic will be detoured to Rochester Road.

KEY NOTES:

- ▶ Access to businesses and residences will be maintained throughout the project
- ▶ Traffic through major cross roads will be maintained throughout the project
- ▶ Non-consecutive side street approaches may be closed for short durations, when neighborhoods have alternate access
